CLAIMS

- A pressurising device for clearing of passageways of liquids and fluids comprising:
 - a piston for pressurizing a clearing agent;
 - a cylinder for containing said clearing agent,
 and
 - a coupler for connecting said cylinder to a treated device.
- 2. A pressurising device for clearing of passageways as in claim 1 and wherein at least a part of the external surface of said cylinder is threaded for applying a tightening member for tightening said piston.
- 3. A pressurising device as in claim 1 for flushing a hand piece of a dentist, comprising:
 - a piston for pressurizing a cleansing fluid;
 - a cylinder for containing said cleansing fluid,
 and
- a coupler for connecting said cylinder to a coupler of said hand piece.

WO 2005/060347 PCT/IL2004/001151

4. A pressurising device as in claim 3 and wherein at least a part of the external surface of said cylinder is threaded for applying a tightening member for tightening said piston.

- A pressurising device for clearing of passageways as in claim 1 for clearing pneumatic system.
- A pressurising device for clearing of passageways as in claim 1 for clearing hydraulic systems.
